## **DX NEWS**

### **N5J Jarvis Island DXpedition –update August 15**

In response to the requests to run normal Fox Hound mode because some stations are having difficulty with the SuperFox mode, effective 00:00 UTC 16 August we will convert one of the two WSJT-X stations to the old Fox Hound method.

We ask all stations who already worked us in the digi band mode to let those people still needed a digital QSO to work us. Check Club Log if you are unsure.

We will still have another station in Superfox mode. We hope this allows more stations to make it into the log on digi or even an ATNO.

### **C21MM Nauru DXpedition –update**

C21MM homepage has been online since July 28, 2024. In between we all got our visas for Nauru and Australia. On our way from Germany to Nauru there is an overnight stay in Brisbane. Today we would like to give you some insights on our logo. If you try to find something typical for Nauru, you always come across **phosphate mining**, which is a story about colonialism and how fast wealth can fade away. This is what the excavator stands for. However, there is still beautiful nature on the island like the endemic bird, the **Nauru Reed Warbler** which can be seen on the logo. We have to admit it's a slightly beautified version of it. The original can be seen on one of the stamps of the small island: To make the logo complete, the famous 5 band LZ beam is of course a must. Thanks to Vincent, F4CVQ for the artwork of the logo and Fred, DH5FS, for the idea.

### **VK9CV Cocos Keeling Islands –update**

Miro OM5RW has joined the VK9CV team. He's a very experienced operator and will focus on 160m.

## VU4X Andaman Islands –update

The DX-Adventure team is busy preparing for the next DXpedition to the Andaman Islands. They would like to know from you which bands are important, to get an overview per continent.
